Members: Alvarado Frank, Anrrango Mario, Armas Kleiner, Arroyo Alfonso.

Team: A-Byte Wizards.

NRC: 14539

Topic: Sketch of Unit 1 project.

INVENTORY SYSTEM FOR A CRAFT STORE

The "Inventory System for a Craft Store" called, "Universo del Fomix", is our project whose main objective is to keep a record of the products available and also the quantities in stock. |

First of all, we had to understand the needs of our customer, then, the design of how we can look for the products, categories and suppliers; also, we have to make a database to register the products, the sales, suppliers, etc. And finally we have already arrived at the application development, obviously having first designed the respective tests. Always making a friendly interface for our customers, testers, etc.
